

Preston Arnold

Full Stack Developer

preston@example.com • github.com/preston • +44 123 456 7890

Innovative full-stack developer with expertise in building scalable web applications and modern PDF generation systems. Proven track record of architecting elegant solutions that serve 100K+ users while maintaining clean, maintainable codebases.

TECHNICAL EXPERTISE

TypeScript, JavaScript, Python, Rust

React, JSX, TailwindCSS, Modern UI/UX Design

Node.js, PDF-lib, RESTful APIs, System Architecture

PROFESSIONAL EXPERIENCE

Senior Developer - FusePDF Project

2024 - Present

- Architected innovative JSX-to-PDF rendering engine using TypeScript and modern design patterns
- Developed component-based PDF generation system with automatic pagination and styling
- Designed reusable Box, Text, and Section components with advanced layout capabilities

Full Stack Engineer - Tech Innovations Ltd

2022 - 2024

- Delivered scalable web applications serving 100,000+ active users with 99.9% uptime
- Spearheaded company-wide migration from JavaScript to TypeScript, improving code quality
- Mentored team of 5 junior developers in modern development practices and best patterns

FEATURED PROJECTS

FusePDF - JSX-based PDF Generation Library

Revolutionary approach to PDF creation using React-like syntax with automatic pagination, advanced styling options, and intuitive component composition. Built with TypeScript for type safety and developer experience.

Portfolio Generator - Automated Resume Builder

Dynamic portfolio generation system featuring customizable themes, real-time preview, and multiple export formats. Implements modern tooling and best practices for maintainable, scalable architecture.
